Marvel: Ultimate Alliance is an action role-playing game starring the superheroes and villains from the Marvel Comics franchise. The Xbox 360 version of Marvel: Ultimate Alliance has cheat codes that unlock all characters and other secrets. Activision Press the following buttons on the Xbox 360 controller at the indicated screen to unlock cheats. Some cheat codes must be entered more than once for activation. You'll hear a sound confirming the correct code entry. Activating cheats will prevent you from earning Gamerscore points from achievements. You'll also be able to continue leveling up your powers, even if you maxed out your characters in normal mode. Go to the area in Mephisto's Realm where you have to throw demon jumpers into a fire to lower a pedestal. When you defeat the demons, more will automatically spawn, so keep killing them to earn unlimited money, experience, and energy refills. Unlock the second and third costumes for characters as they level up. Complete the Combat Training challenge with each character to unlock their fourth costume. Saints Row is an action-adventure video game for the Xbox 360. Similar to the Grand Theft Auto series of games, players race around a virtual city starting fights with gangs and the police using a combination of hand-to-hand combat, melee weapons, firearms, and explosives. Also like GTA, there are tons of cheat codes for Saints Row that make the game even more exhilarating. Joshua Livingston/Flickr/CC 2.0 These cheats apply to Saints Row for Xbox 360. The mobile version of Saints Row lacks features found in the console version including cheat codes. To enter a cheat, pause the game. Then, access your phone, select Dial, enter the appropriate code, and tap Call. Special characters (such as [ ( ) ]) are entered automatically. For codes with letters, you'll find the letters above each number. Tap the number that corresponds to the letter you need. The game recognizes codes beginning with a pound sign (#) as cheats and deactivates achievement points when you use them. Cheats take effect after you enter the corresponding code.
