You may be able to receive a blue treatment card \*: always guide it with you and MuA © Strelu to any medical, pharmaceutical or nurse who treats it. Read your doctor if you develop new infections when taking these tablets, prolonged use can lead to eye problems, for example, cataracts or glaucoma. The symptoms of Drawnal, such as fever, muscle weakness or pain, pain joints or discomfort (feeling sick), can happen after stopping the long-term treatment with dexamethasone.1. Inform your doctor, pharmaceutical or department of accidents from the nearest Hospital immediately.2. Take the tablet / container and tablets remaining with you so that people can see what it has taken.3. Do this, even if it feels good, if you forget to take a dose, it's as soon as you remember it, but if it's almost the time for your next dose, omit the dose forgotten and continued as of cost MBRE These corticosteroids occur naturally in the body, and help maintain health and well-being. Before taking the dexamethasone tablets.3. Do this if you are taking these tablets, or have taken them during the previous 3 months. If you have an accident, you get sick, you need a surgery (even on the dentist), or that it has any A à € "" → "virus". Vaccinations During or after treatment with dexamethasone tablets, you should tell the person who is trying to take or have taken steroids. Report to your doctor or pharmaceutical if you are taking or recently taken any other medication, including medications obtained without medical prescription and herbal preparations. Having strange and terrifying thoughts, changing how it act or has feelings of being alone. If you notice any of these problems, talk with a doctor immediately. of dizziness or spinning. Sweatingnausachanges in Vision, including visual disturbances or visionmalaise loss (sick feeling) salutes from the wound of Hindamed Hindamed Helled Tool swallowing, sore throat, a feeling of chest pain (which may be signs of a fungal infection in the oesophagus (gullet)stomach pain and discomfort, swollen abdomenincreased appetiteraised blood pressuresalt imbalances, fluid retentionswelling and weight gain of the body and facehigh blood sugar, with symptoms such as excessive thirstincreased requirement for diabetic medicationmuscle weakness and wastingthinning of bone with an increased risk of fracturespain behind the ribs radiating towards the back, often worse when lying down, nausea, vomiting, fever. The Patient Information Leaflet (PIL) is the leaflet included in the pack with a medicine. Do not take a double dose to make up for a missed dose.Stopping this medicine suddenly can be dangerous, and may cause low blood pressurea relapse of the disease for which treatment was given.Keep taking the tablets until your doctor tells you how and when to stop.Do not let yourself run out of medicine, especially over the weekends or on holidays.If you have any further questions on the use of this medicine, ask your doctor or pharmacist.Like all medicines, Dexamethasone Tablets can cause side effects, although not everybody gets them. They can affect about 5 in every 100 people taking medicines like dexamethasone.Feeling depressed including thinking about suicideFeeling high (mania) or moods that go up and downFeeling anxious, having problems sleeping, difficulty in thinking or being confused and losing your memory.Feeling, seeing or hearing things which do not exist. This leaflet was last updated in March 2017.Keep this leaflet. Ask your doctor or pharmacist if you are not sure.Swallow the tablets with plenty of water, with or immediately after a meal to prevent upset stomach.Take the tablets regularly as advised by your doctor to obtain the maximum benefit.Adults and the elderly:The usual dexamethasone starting dose is 500mcg to 9mg per dayYour doctor will tell you the Dose and when taking it depending on your condition, and you can give you the lowest dose to reduce side effects and control your condition. Your doctor can change the dose during treatment. The most selling patients will be monitored more frequently to children: usually a unique dose will be given alternate days. Your doctor will decide on the appropriate dose to suit his condition. Possible side effects5. The original brochure can be seen using the link above. How to take the dexamethasone tablets4. Your doctor can verify your child's height at intervals during treatment and reduce the dose if the effects are seen. Imminent health problems can occur when taking steroids such as dexamethasone (see the possible side effects of Section 4), it can be serious. A few days or weeks start of medicine. It is more likely to happen at high doses. Most of these problems disappear if the dose is reduced or the medication stops. It is written for patients and provides information about taking or using a medication. MantA © ngase away from people who have chickenpox or tiles, if you have never had them. The version of only text may be available on large, braille or audio cd. They could affect you severely. If you come into contact with chickenpox or tiles, consult your doctor immediately. Now read the rest of this booklet. This includes any possible side effects that are not listed in this booklet. Dexamethasone reduces this inflammation, which could otherwise continue to make your condition worse. These include the weakness of the arms and legs, or developing a more Round face (reading of Section 4 for more information). If you take it for more than 3 weeks, you will get a blue card \*: always keep it with you.
