The US version of Apple's iTunes Store (pictured) has much wider selection of movies than the UK version does Apple (opens in new tab) is very close to inking a deal with Fox that will see the studios' entire movie output being made available on iTunes (opens in new tab). But the deal has only been possible because Apple has compromised over how much it will sell the movies for. Apple currently sells the entire Disney back catalogue, plus selected MGM, Paramount and Lionsgate films for \$15 (£7) and \$10 (£5). Apple Insider says Fox is asking for downloads to be priced higher than \$15 - something that Apple has refused to do until now. Richard Greenfield at market analysts Pali Research says the only thing that's holding up the Fox deal are Christmas DVD sales, which Fox obviously doesn't want to dampen. That could put the announcement on online release of movies like the Star Wars series, Borat and Minority Report as early as Tuesday January 15th - the date of Steve Jobs' keynote address at the Macworld Expo in San Francisco. Value-added DVDs The Apple-Fox agreement has been spurred by increased piracy and a desire by studios to sell 'premium priced' DVDs which also include a digital copy of a film that can be watched on devices like iPods (opens in new tab). Premium pricing is expected to add \$3 (£1.50) to \$4 (£2) to the cost of a DVD. Pali Research's Greenfield also says that once the Fox deal is done, other Hollywood studios will quickly follow suit. We're hopeful that any announcement in January will also involve territories outside the US. The UK iTunes Store, for example, still only has a paltry selection of movie shorts from Pixar - a company once owned by Apple CEO Steve Jobs. That's simply unfair when you can buy full-length blockbuster movies like Pirates Of The Caribbean: At World's End on the US version. If Apple does make downloadable movies available here, it's likely to be welcome by culture-starved Brits. 61 per cent of those who took part in a BroadbandChoices.co.uk survey said they'd like to be able to download DVD quality movies, according to the BBC. We'd also expect any digital copy of a movie to be at least Apple TV (720p HD) quality if we're expected to pay a premium for it. By Chanel Adams i mp3 player image by patrimonio designs from Fotolia.com Your MP4 player does more than just play music and video. You can either listen to audio books or read eBooks on it. Downloading these types of books to your MP4 player is a relatively easy process. Make sure you know which types of books and files your player uses before attempting to download any files. Otherwise, the files will either not work or will corrupt your MP4 player. Look through your user guide to find out the kind of file formats your MP4 supports. This helps ensure that you can view the file on your MP4 player. Convert the file, if necessary. Several online programs allow you to convert your eBook or audio book. Remember to convert to a format that your MP4 player recognizes. Attach the USB cable to your MP4 player. Connect the other end to your desktop computer or laptop's USB port. Click "Start" and "Computer." Go to the location where you saved your books. Right-click and select "Copy." To select more than one book, press and hold the "Ctrl" button. Navigate back to your "Computer" menu. Double-click your MP4 player's folder. Right-click and select "Paste." Wait for the download to complete. By Daniel Westlake A movie soundtrack is one of the most important parts of a film, yet few people know how or where to download them. You can buy tracks at iTunes or AmazonMP3. However, there are a number of online sites where you can download that amazing movie soundtrack you heard in that film the other day. All you need to do is identify the movie, the composer and check out one of these sites. An extensive database that goes beyond the opening theme song, the song over the credits or the tune all the characters dance to - it features the less notable numbers from a film that only real fans will recognize. With more than 45,000 titles to choose from, SoundtrackCollector.com is for the serious musician and soundtrack enthusiast

who is truly a fan of composers and the often brilliant and underappreciated work from do every film. With what may be the biggest database of movie soundtracks online, ArtistDirect.com provides most of these downloads for free (with a fee that must be paid for access to others). However, most of the soundtracks that are the easiest to find are mainstream pop songs that have been purchased for the soundtrack, not necessarily from composers who have done movie scores. Keep this in mind if you are looking for something reasonably obscure. Last.fm seems to have most music tracks in its database--the challenge comes with finding those tracks. If you're going to use Last.fm to track down these free soundtracks, have all the keyword information available to locate them. Some of the titles are listed by film, some are listed by composer and others are just listed by title. Don't be discouraged if you can't find it initially--or just use one of the other sites listed above.
