There is also no need to install a WordPress plugin. If it turns out that you often visit the Internet or use an Internet application on the iPhone or iPad, it is easy to add a bookmark icon directly to the home screen using Safari, which can be quickly pressed on the Internet.As. Adding a website to the initial screen of your iPhone first, open Safari and go to the website you want to add to the initial screen of your iPhone. Once there, make sure you see the navigation bar by touching once in the lower part of the screen to make it appear. On the navigation toolbar in the lower part of the screen, it touches the sharing icon (a rectangle with an arrow facing upwards).

The sharing menu will appear at the bottom of the screen.

Drag it up with your finger and scroll the list. Click Add to the main screen. The Add to Home School menu appears. Using this menu, you can appoint the new web icon of the initial screen as you prefer using the on-screen keyboard. At the end, click "Add" in the upper right corner of the box. The website icon will be displayed on the initial screen. Every time you want to use it, click on the connection as if it were a normal app. Safari will open automatically and charge the website. Add a website to the desktop of your iPad Open Safari on your iPad and go to the website you want to add to your desktop. Once there, make sure you see the navigation bar by touching at the top of the screen to open it. Find the sharing icon (a rectangle with an arrow facing upwards) in the navigation bar at the top of the screen. Click here. The sharing menu will appear on the right side of the screen. Click Add to Home screen. You will then see a pop-up called "Add to the initial screen" in which you can appoint the new icon of the initial screen as wishes. At the end, click "Add" in the upper right corner of the box. On the IPAD Home screen the icon of a website is displayed. Every time you want to visit a web page, simply click on the connection. Safari will open and charge automatically. Further information on the web connection icon The icon of the web page that we created with Safari has the appearance and works as a normal app icon on the initial screen of your iPhone or iPad.

You can group it with othersAdd it to the folder or pull it into the dock. You may find that some websites have starting screen symbols that seem to be perfect for iPhone or iPad. In fact, these websites have created an image especially for this purpose and defined it in their website code. Otherwise, your iPhone or iPad will generate a small miniature picture of the website that is used as a symbol. So far, Safari can only establish such a connection. And since Apple does not allow them to change the preset browser, places are always invited to Safari. But it is a practical way to speed up your experience with the iPhone or iPad. Experiences.
