The disadvantages of models have become small amount of memory (8 GB without the possibility of extension) and a small duration of the flight (no more than 11 minutes). Drone differed little weight as made out of nylon and carbon fiber, and was able to accelerate to a speed of five meters per second. The first AR.Drone quadcopter called and controlled via a smartphone using Wi-Fi. He was immediately recognized as the best entertainment device. Parrot Company is considered as one of the leaders in the creation of drones in the future for sure again surprise consumers unique developments. UAV is equipped with multiple sensors, three-axis digital camera stabilizer and autopilot. There was also the opportunity to acquire control Skycontroller. UAV Parrot Disco - is the latest development of the company. In 2014, the company showed quadcopter Bebop Drone 2.0. The new device is fundamentally different from the AR.Drone as the appearance and characteristics. Manage quadcopters can be from a smartphone or tablet. The flight duration record of 45 minutes. In addition, to improve the accuracy of altimetry in drone was built in barometer. Home sales scheduled for the end of this year. Its main function - the storage and playback of voice recordings (notes, reminders, address, etc.). The device operates on different Bluetooth and ease of management. Also in 2013 the company presented an improved modification of the drone, which was called the AR.Drone 2.0 Elite Edition. It was increased battery capacity, thus improving the duration of the flight. In drone was built in GNSS chipset that allowed to stand for quadcopters specific route, as well as helping drone back to the start point. Even a novice can operate drone as piloting the process control computer. In addition, automatic protection screws to prevent damage the camera lens has been improved and added in the event of contact with an obstacle. In 1995 he was released one of the most popular devices company - Parrot Voicemate, which is intended for visually impaired people.

The developers have taken into account the shortcomings Bebop Drone 2.0 and the end of 2015 released a modified Bebop 3.0. In drone was fitted battery with high capacity, which will increase the flight duration of up to 25 minutes. On this page, you can download user guide for Parrot drones, such as: Parrot Disco, Parrot Bebop 2, Parrot Bebop, Parrot AR Drone, Parrot AR Drone 2, Parrot Skycontroller, Parrot Swing, Parrot Mambo, Parrot Airborne Night, Parrot Airborne Cargo, Parrot Jumping Race, Parrot Jumping Sumo, Parrot Jumping Night, Parrot Hydrofoil, Parrot Rolling Spider. Range drone flight reached two kilometers. In quadcopter it has built-in camera that can recognize and track objects. Bebop was equipped with 14-megapixel Fisheye-camera with video recording capability in FullHD format. The first drone Parrot company introduced in 2010, and has been for six years, constantly expanding its range of unmanned devices. In 2014 the company introduced immediately two interesting devices: Rolling Spider - drone, which can not only fly, but also to travel. Also drone equipped with a camera and can move on infectious than planned route. With this equipment the drone is able to perform acrobatics. Functionality has been added to the GPS-tracking. To drive in the kit includes two light wheels; Jumping Sumo - this drone is not suitable for flying, but can jump to a height of eighty centimeters. The route can be edited using a smartphone or PC. The maximum duration of the flight was 12 minutes. The device is equipped with two rubberized wheels, spring mechanism and gyroscope. Six years later, the company entered the automobile market by launching several wireless hands-free models of vehicles. The device to recognize the voice and "understand" the eleven languages, and the user with voice commands could run the built-in functions (such as voice memos). Organization since its foundation specializes in the development of devices for voice recognition, which is why the name Parrot was chosen for it, which means parrot. Dron was presented at the exhibition CES 2016. Gradually, the company switched to the production of unmanned aerial vehicles and drones for other purposes.
