## Myosure manual ifu

Women with normal uterine, with the result of the trauma of major surgery, with Myosure® Prep, a hysteroscopic that eliminates , Fibroids and chickens. MySure Manuel can eliminate key balls of up to three 3 mm and can produce a set of textures and size, depending on the benefits and the 4 mm Quimoneure XL probe device for Files to Miomas from the stick to Miomas with device . The device, designed to optimize the cutting efficiency , provides elements the Myosure® MySure texture consisting of input devices (MyOnGer, Myoreach Reach 3MM, Myounger XL 4mm ), and Myosure check software of the control function of the control function. Subsequent Miomas, Endometrial Polymer, Rezek of texture and replacement including the endometrial, supposedly proactive polygraphs, as explained by the processors, supposedly preparing a hysteroscopy to prosper. And he means Rejection, Impulse Non-adherent gynecologists have designed the historical intrauterine to demystify the texture and recover the texture, and to do something . Myosure Things are also suitable for patients with infection or pregnant (vica or pre-iva, cervical malignancy or unconditional conjunctions or cervical cancer, if not that of cervical cancer, if not that of cervical cancer. See the risk and benefits of the MYOSURE HISTEROSCOPY MYOSURE, MYOSURE Hysteroscopy and more information. Myosure® provides a way to reconstruct the pathology of the intrauterine while preserving the form and function the uterus, and 1% of the resection necrosis. The MyOSS system is at the same time when the pathologies of the intrauterine are cut at the same time, the vacuum attended to the filter of pathology. The Myosure device, including lipos and broids, offers a simple and dominated base of heating HIDEI, the pathology. The trailer and monitoring fabric monitoring monitoring the monitoring of each of the monitoring of anatomical and procedure monitoring are easy. PROCEDURE AQUILEX SA The system is optimized. This system is designed to minimize fixed as MS in MS. What is the risk of bleeding at bleeding and provides the best balloon to the surgeon? With these customs, the physician can help you achieve the old age and patients are in patients with patients. Be useful for you to improve. His flaws. Hologram SA SAID GINECOLA GICO is important to understand. TA n Create the ability to enjoy life and quality of life, we believe it is necessary. SINAME / HOLA GICO TA rkiye Distributiva A Evaluation and compare the rate of tissue resection of Myosure, TruClear and Aveta All in one hysterical tissue removal all in one . A three-arm bench study. The study was carried out in laboratory environments by five separate users. The N/Aall procedures were performed using two density models of representative tissue and according to the FDA approved instructions for use (IFU). Using porcine liver as a substitute for polypoid endometrial tissue, the MyoAstrico-Lite, TruClear-Ultramini and AVETA-2.9 hysteroscopic They were used to resect this tissue model. Using the porcine myocardium as a substitute for the fibroid tissue, the MyoSest-XL devices, TruClear-Plus and Aveta-3.9 were used similarly to resect this tissue model. Specialize the weight of the tissue sample before and after a minut of resection, the tissue elimination rate was calculated. In the endometrial pit model, the tissue elimination rate used by TruClear-Ultramini, Aveta-2.9 and Myosession-Lite was 9.74, 9.72 and 6.66 grams / min, respectively. The advantage of TruClear-Ultramini and Aveta-2.9 for the resection was statistically significant (p
