

I'm not robot!

In grade 6, students have encountered several ways to separate mixtures. Most of these are mixtures or separate homogeneous mixtures such as sand/water, ethanol/water, and oil/water. In this activity, the oil component of a homogeneous mixture is separated from the water component. It is important that they are aware of the fact of mixing that the mixture will be a mixture. The oil and water level characteristics of elements such as those in the table on the right. They may check the sample that they are going to use in this activity if it does have the characteristics listed in the table. The mixture should have the same characteristics as the mixture, however, they cannot be distinguished because the sample is homogeneous. The activity will help them 'test' the components of the mixture sample which are oil and water. They will detect the water and from the mixture and see what is the product or diluted water. The remaining sample will evaporate and the rest of the water having salt crystals.

Support:
 • Explain the area written in the 'Your Goal' boxes.
 • Make sure to use glasses that were not previously used for harmful chemicals. The students will be asked to have a portion of the solution.

Name: _____ Date: _____

Review Quiz, Lesson 6-1, Patterns For Dividing With Decimals

Directions: Find each quotient by using Patterns and Mental Math to divide.

- | | |
|----------------------------|-----------------------------|
| 1) $136.5 \div 10 =$ _____ | 2) $289.66 \div 10 =$ _____ |
| $136.5 \div 100 =$ _____ | $289.66 \div 100 =$ _____ |
| $136.5 \div 1000 =$ _____ | $289.66 \div 1000 =$ _____ |
| 3) $15.25 \div 10 =$ _____ | 4) $1.275 \div 10 =$ _____ |
| $15.25 \div 100 =$ _____ | $1.275 \div 100 =$ _____ |
| $15.25 \div 1000 =$ _____ | $1.275 \div 1000 =$ _____ |
| 5) $136.5 \div 10 =$ _____ | 6) $289.66 \div 10 =$ _____ |
| $136.5 \div 10^2 =$ _____ | $289.66 \div 10^2 =$ _____ |
| $136.5 \div 10^3 =$ _____ | $289.66 \div 10^3 =$ _____ |
- 7) Any number to the power of 0 gives you an answer of _____.
- 8) When dividing by a power of ten, we always move the decimal to the _____.

Review Quiz, Lesson 6-2, Estimate Decimal Quotients

Directions: Find the quotient by estimating.
