Pc building simulator latest version download. Pc building simulator latest download. Pc building simulator latest version. Pc building simulator latest version. Pc building simulator latest version free. Pc building simulator jobs.

As we enter another action-packed month, we're kicking things off with a major update - v1.15. This time around we're growing the entire parts, and one more venue to build it all in. First though, we sailed the high seas looking for computing's finest privateers and returned with one of their newest treasure chests. Introducing the CORSAIR icute 5000T case. Continuing the 5000T case case range first shown during CES2021, we're excited to unveil the latest entries' digital counterpart to closely coincide with the physical release. Free Workshop: Irratech Open-plan Productivity, the head honcho, el numero uno, mr big, godfather, and lord of the rings is venturing into uncharted territory. By orders from the top, we're giving all players access to the brandnew Irratech open-plan productivity suite (IOPS) office ready for all your first quarter chart boosting constructions. Filled with as much personality as a person can reasonably fit into each two-metre-wide regulation table and unused notice board, let this be the office arcade machine to your problems. Now usable in free build or career mode **Pictures of loved ones not included.New PartsHighlightsColorful CVN X570 GAMING PRO V14SilverStone PF360W-ARGBFull parts listMotherboards; CORSAIR iCUE 5000X RGBCase Fans; CORSAIR iCUE SP 120 RGB EliteSILVERSTONE Air Blazer 120RSILVERSTONE Air Blazer 120RWAir Coolers:ARCTIC Alpine 23 COARCTIC Alpine 23 COARCTIC Freezer 34 eSports DUOARCTIC Freezer Xtremebe quiet! Fixed an issue which could lead to save file corruption if the user has a large number of saves. The UI will now correctly align icons when starting a new career mode game. Fixed an issue which caused controller inputs to disappear after accessing the End Day Menu a second time. Adjusted filtering criteria for CPU Coolers to work as intended. Adjusted UI elements to work in ultrawide resolutions during the IT expansion, specifically tested to 5120x1440. Fixed an issue which caused the red cable highlight to remain floating when pressing the power key and hovering over the CPU with the Cooler selected at the same time. Fixed an issue where users can see floating motherboard standoffs while looking at a PC monitor. Fixed an issue which led to save file corruption when switching workshops. The background of the calendar will no longer self-illuminate. Parts: CPU coolers, AIO coolers and CPU blocks can no longer be installed while the CPU shield of the MSI MPG Z590 CARBON EK X motherboard is open. Adjusted the routing of 24-pin cable to prevent clipping through the side panel of the CORSAIR Carbide Series 275R case. Corrected the placement of PSUs inside the be quiet! Pure Base 500DX case. Adjusted the AMD Radeon RX 5700 to match its real-world counterpart more closely. Fixed an issue which caused the header of case fan cables to clip through the EVGA Z270 FTW K motherboard. The ASUS TUF Z370-PLUS GAMING motherboard will no longer allow two 4 pin cables to connect into the same slot. Prevented the PSU mount of the be quiet! Silent Base 500 case from being installed if the PSU is already plugged in. Reduced the number of instances which would cause clipping with the ASUS TUF Z370-PLUS GAMING motherboard. Reduced the number of instances which would cause clipping with the ASUS TUF Z370-PLUS GAMING mother cases. USB devices will now correctly align with USB ports on the Fractal Design Node 202 case. Adjusted the Raijintek Asterion Plus case collision to reduce clipping with the side panel. Team Group ZEUS DDR4 GAMING RAM now correctly features the heat spreader on both sides. Fixed the collision of the ASUS TUF X299 MARK 1 M.2 Drive Bay. Changed the pathing of the motherboard 24-pin cable in the GamerStorm Genome ROG Certified Edition case to prevent them clipping with the PSU.Reduced the number of instances which could lead to cables clipping through GPUs inside the EVGA D-85 Full Tower Case. Changed the pathing of motherboard 24-pin cable in the ADATA XPG Defender Pro case to prevent clipping with drive bays. M.2 storage units can no longer be teleported through GPUs inside the EVGA D-85 Full Tower Case. Changed the pathing of mother points can no longer be teleported through GPUs inside the EVGA D-85 Full Tower Case. GA-AB350-Gaming 3 motherboard, another victory for science.Increased the AIO compatibility of the Lian Li O11-D XL-X case.Corrected the length of the EVGA Supernova 1600 T2 PSU.Adjusted the routing of 24-pin cable in the be quiet! Silent Base 600 Window (Orange) case to prevent clipping with the side panel. Significantly reduce the number of clipping issues will no longer clip through the GTX 980 Ti GAMING 6G.Adjusted the power button cable to prevent clipping with PSU inside be quiet! Silent Base 600 Window (Orange) case.Reduced the number of instances causing clipping with RAM while using the Mortoni H170 Mtech plus motherboard. Fixed cable routing to prevent case fan and 24-pin connector cables clipping in the Deepcool EARLKASE RGB WH case. Revisited cable routing setup in the Cooler Master Silencio S600 case to reduce clipping and make it appear more natural. Changed the pathing of the Cooler Master MasterAir Pro 4 cable to prevent it clipping through RAM. Improved the RGB lights to illuminate the centre of the ADATA XPG Defender Pro front panel. Changed the pathing of the Cryorig C7 cable to prevent it clipping through RAM. Main power cable clips through the InWin 925 case.GPU power cables will no longer clip through the ZOTAC GAMING GeForce RTX 3070 Twin Edge OC.Rerouted the routing of 24-pin cable in the Raijintek Asterion Plus case to reduce clipping issues. Adjusted the routing of 24-pin cable in the Raijintek Asterion Plus case to reduce clipping issues. Adjusted the routing of 24-pin cable in the Raijintek Asterion Plus case to reduce clipping issues. Adjusted the routing of 24-pin cable in the Raijintek Asterion Plus case to reduce clipping issues. Adjusted the routing of 24-pin cable in the Raijintek Asterion Plus case to reduce clipping issues. Adjusted the routing of 24-pin cable in the Raijintek Asterion Plus case to reduce clipping issues. cable in the ADATA XPG Defender Pro case to reduce clipping issues. Peripheral cables will now be far less likely to clip through PC cases. Improved the quality of the CPU Handle Highlight of the MSI B450 TOMAHAWK motherboard. Fixed collision issues between dust and the Antec P110 Luce case. NVIDIA GPU power cable extensions will no longer clip through the ADATA XPG Battlecruiser case side panel. Fixed several clipping issues between the cables and the PSU in the EVGA DG-7 series cases. Fixed an issue with the GIGABYTE AORUS F127Q-P monitor which led to visual artefacts. Cables will now be routed more naturally inside the NZXT H700i case. EKWB EK-Supremacy EVO CPU blocks will now correctly use AMD CPU mounts on AM4 motherboards. Fixed an issue which caused the EVGA FTW3 2080ti to be un-interactable in the In Win A1 case. Adjusted the collision checks of the NZXT Kraken M22 AIO to reduce the number of RAM conflicts in randomly generated PCs.Adjusted the collision checks of the NZXT Kraken X42 AIO to reduce the number of RAM conflicts in randomly generated PCs.Career:Fixed an issue which led the "Use mobile" text to appear too far away from the icon in the Esports Expansion DLC. Fixed tournament monitors' display alignment in the Esports Expansion DLC. Workshops: Corrected a UI issue which caused the Tournament Tutorial to display the default keybind for the Finish Work action. Tournament monitors will now connect to their power cables, science wins again.Corrected several cable issues with peripherals on the main desk PC in the third Esports Expansion workshop. Fixed an issue which led plants to present corrupted textures inside the Default workshop. The calendar will no longer clip through the door frame inside the Default workshop. The calendar will no longer clip through the door frame inside the Default workshop. The calendar will no longer clip through the door frame inside the Default workshop. The calendar will no longer clip through the door frame inside the Default workshop. The calendar will no longer clip through the door frame inside the Default workshop. The calendar will no longer clip through the door frame inside the Default workshop. The calendar will no longer clip through the door frame inside the Default workshop. The calendar will no longer clip through the door frame inside the Default workshop. The calendar will no longer clip through the door frame inside the Default workshop in the door frame in the Default workshop in the door frame in the Default workshop in the Default wor first workbench in the first workshop. Adjusted the spawn point of the Fractal Design workshop in career mode. Moved the power plug cable to prevent clipping with the workbenches inside the Spawn point of the Fractal Design workshop. IT Expansion. workshop.Removed an incorrect texture present on the ceiling of the fourth IT Expansion workshop.Outlets and power cables are no longer missing in the Pathe.Elster@irra.tech off-site job.Removed an incorrect texture present above the inventory cabinet between the wall and the ceiling inside the fourth IT Expansion workshop. HDMI cable now correctly visible for the main desk in the fourth IT Expansion workshop. Peripheral cables now correctly visible for the main desk in the fourth IT Expansion workshop. Peripheral cables now correctly visible for the main desk in the fourth IT Expansion workshop. Peripheral cables now correctly visible for the main desk in the fourth IT Expansion workshop. Peripheral cables now correctly visible for the main desk in the fourth IT Expansion workshop. Peripheral cables now correctly visible for the main desk in the fourth IT Expansion workshop workshop. Peripheral cables now correctly visible for the main desk in the fourth IT Expansion workshop wor given by Charles.Mattrick@irra.tech when the player language is set is Korean.Minor update | v1.15.1Bug fixes:Fixed an issue which prevented several 360mm AIO coolers from being installed inside the CORSAIR iCUE 5000D Airflow case when used with an ASUS ROG Strix B550-F Gaming Wifi motherboard.Corsair iCUE 5000 cases should now correctly fit custom water loop reservoirs when a radiator is installed above the reservoir slot. Fixed an issue which caused Corsair iCUE 5000 cases to incorrectly detect collision when installing a custom water-cooling radiator if a reservoir is already installed. Adjusted pathing to prevent clipping issues with 4 pin cables in the Corsair iCUE 5000X RGB, 5000D and 5000D Airflow case. Update | v1.15.2Bug Fixes: General: Fixed an issue which prevented the Cloud Notes app from accepting mouse inputs after the 29th line. Improved the clarity of GPU minimum requirements listed in Will It Run for League of Legends. Corrected issues with phone behavior when in assembly mode in the Esports Expansion DLC.Parts:Fixed an issue which caused the be quiet! Dark Rock TF 2 cooler to clip with case fans in NZXT H210i case.Reduced the number of instances causing cable clipping inside the InWin 303-MSI Dragon Edition case.Adjusted collision to prevent AIO and custom radiators from clipping with the drive bays in the NZXT H170i case Increased the number of compatible AIO cooler and motherboard combinations in the CORSAIR iCUE 5000X RGB case. There will no longer be two instances of the Corsair Vengeance LPX (Red) 32 GB 3600 Mhz memory in the shop. Fixed an issue causing conflicts between case fans and other components inside the be guiet! Pure Base 500DX case. Adjusted the pathing of the 24 pin cable to prevent clipping with the NZXT H510 Elite case. Improved collision of M.2 storage units to prevent several clipping issues with Fractal Design Node 202 case. Improved fan cable pathing in the SilverStone PS14 case to reduce clipping with large coolers. Players can now correctly install USB devices on the ASUS ROG Strix X570-I Gaming motherboard if a be quiet! Dark Rock TF2 cooler is present. Adjusted bottom panel alignment in the Lian Li O11D XL-S case. Improved the performance of the ARCTIC Freezer 34 eSports DUO CPU cooler. Side panel screws will now correctly tighten all the way on the CORSAIR iCUE 5000D series case. Colorful iGame GeForce RTX 2080 Ti Vulcan X OC GPU no longer presents wobbly fan behavior. Fixed a number of collision issues with the EVGA SuperNOVA 1600 T2. Adjusted cable routing to reduce instances of GPU clipping in the MSI MPG Sekira 500P case. Adjusted cable routing to prevent EVGA Z270 FTW K's 24 pin cable swill no longer clip through the Fractal Design Define R6 case. Improved CPU handle texture on the ASRock B550 Pro4 motherboard.Improved the collision of the BVGA DG-77 case.Significantly reduced the instances of clipping between 280mm AIO coolers and the ADATA XPG Defender Pro case.Adjusted the pathing of the 8-pin cable to prevent clipping with the heatsinks of the ASRock TRX40 Taichi motherboard inside the Raijintek PAEAN case.Players will no longer be able to install the PSU Shroud of the Raijintek NYX PRO case when the power cables are connected to the PSU.Fixed an issue which caused clipping between the Raijintek PAEAN M case.The Colorful CVN B365M GAMING PRO V20 motherboard now correctly allows players to connect radiators when installed inside the Raijintek PAEAN M case. Significantly reduced the instances of clipping inside the CORSAIR Carbide Series 275R case when turning workshop lights are turned off. Large mouse pads will no longer clip with aftermarket keyboards. UIFixed an issue which caused the 'Menu' key bind icon to be displayed twice in the key bindings sub-menu when using a controller. Fixed an issue which prevented players from accessing the peripherals search bar while using a controller. Fixed an issue which prevented controller prompts from correctly showing when opening the Change Workshop sub-menu. The warning hint showing that 'Piping is locked' will now display more accurately. Players using a controller can now correctly quit from the calendar. Camera rotation input will now be accepted whilst the player is scrolling a checklist. Career: Players should now be accepted whilst the player is scrolling a checklist. Career: Players should now be accepted whilst the player is scrolling a checklist. Career: Players should now be able to reinstall the AIO cooler after diagnosing and fixing the PC from the "L.Field@FieldRodents.net - NEED FIX" job.Reduced the number of conflicting parts generated by PCs through the random job generator. Workshops Expansion DLC workshops Expansion DLC workshop in the first Expansion DLC workshop in the first Expansion DLC workshop in the first Expansion DLC workshop. DLC workshop. Fixed an issue which caused low quality shadows inside the third IT Expansion workshop. The front desk PC's power cable will no longer send the player to the workbenches in the third IT Expansion workshop. The front desk PC's power cable will now correctly connect to the PC in the third IT Expansion workshop.Removed duplicate extension plugs in the offsite job for "Hiram.Young@irra.tech".Stay up to date!Are you tired of contemplating the phrase "silent as the grave" and want to have your say?
