## Moment In Life

I was born on 6 September 1980 in Bangkok, Thailand. The first two people that can describe me the best are my father and my mother. They told me that the first time they saw me they had the happiest time in their lives because I am the first son of them. They said that I was a curious and mischievous boy.

When I was six years old, I entered Chulalongkorn University [Demonstration](#) school. In this school I was taught to be polite, responsible and loved in learning. I have made many friends in this

school and I have had many experiences in this school, too. I was in a student council where I learnt how to work in a group in a democratic way. I was in a volleyball team. I got the [certificate](#) of merit from this school from 1992 to 1996. When I was in grade 11, I decided to go to study abroad because I think that now we live in a globalization and we all need to know other people in other countries in different culture so that we can help one another in the future. My mother and my father agree with me so they asked my aunt that which school in the United States is appropriate for me. My aunt told me that Cranbrook school is a good school in Michigan then I applied for Cranbrook. When I was accepted I am so glad because I can be near and take care of my sister who is now studying civil engineering in the University of Michigan attaining her Ph.D. Before I came here, I promise my mother and my father that I will never make them disappointed. Now I am in Cranbrook school, I have made many friends and I gained more experiences. I am the Residential [Advisor](#) of the dorm and also one of the leader in World Club. I am so happy to be here. In the future I want to be an engineer like my father and my sister so that I can help my father in his engineering company.

I want to be a civil engineer because I like Calculus, Physics, Environmental Science, drawing and when I was young I always saw my father, working on his table, calculating his plan which was my first impression with engineering. Now it is time for me to go for a higher
