Magical RealismIt is a long and unusual journey. I still wonder what it really is. I read the selections of four wonderful authors and I am still a little confused about the real history and theory of magical realism. I do know that before a person gets into this idea of magical realism, he or she really has to have a big imagination and willingness to learn about it. I guess what I am trying to say is that magical realism depends on who a person is and what a person is willing to believe.I thought that Franz Roh's selection was brief on magical realism. I see where Roh compared Magical Realism to Expressionism. He came up with different theories about how to look at certain things in the world. This essay was definitely deep and way out there. He talked about the different ways to represent something. "We recognize this world, although now-not only because we have emerged from a dream-we look on it with new eyes"(Roh 17). It was not just an everyday word, it had to be mystical, magical, fantasized etc. I really do not see how somebody could come up with such an idea. The whole point is he mixes reality with fantasy. In his selection, he talks about the supernatural, things such as aliens that really move some people. Magical Realism plays a major role in issues such as this. People have to go beyond the world and look just a little further. One's imagination will take them places of which they have never dreamed before. Some people swear up and down that aliens, UFO's, and foreign space ships are not real. How do they know? I guess I will have to stick with Roh on believing in

the existence of the supernatural, the magical, and the freaks of nature. Whether I understand completely or not, I think it is really neat how someone can go beyond the unthinkable. That is exactly what Roh does. Some things he talks about I cannot interpret, but I see his outline of it. I do not think there would be any interesting things to look forward to if someone did not use one's imagination and research on things that are mind boggling to the world today. Maybe if more people knew about this "magical realism, they would look at things differently. Angel Flores wrote about magical realism in a way that was hard for me to understand.
