

Stem-Cell Research and the Media

The screenshot shows the EssayPro website homepage. At the top, the logo 'ESSAYPRO' is on the left, and navigation links 'How To Order', 'Reviews', 'About Us', and 'Write My Essay' are in the center. On the right, there are links for 'DBA: EPRO', 'Log In', and a blue 'Sign Up' button. The main banner features a student sleeping at a desk with a pen holder. Text on the banner includes 'WRITING SERVICE AT YOUR CONVENIENCE', 'You - Send us your homework We - Do it all for you', and 'Grab your original paper for just \$10 per page with a free plagiarism report included'. A 'Write My Essay!' button is present. A 'Calculate the price' widget is overlaid on the right, showing options for 'Writing', 'Rewriting', and 'Editing', a dropdown for 'Essay (any type)', 'College', and '2 weeks', a word count of '1 page / 275 words', and radio buttons for 'Double spaces' (selected) and 'Single spaces'. The price is '\$11.4' with a flame icon, and a 'Write My Paper' button is at the bottom. Below the banner, three review widgets are shown: 'EssayPro Reviews' with a 4.9 rating, 'ResellerRatings' with a 4.9 rating, and 'Sitejabber' with a 4.8 rating.

Stem-Cell Research and the Media

Biomedical technology is getting much press due to the stem-cell debate. A controversial topic in itself, with the President of the United States taking a stand on the issue for funding purposes, the topic has received even more press over the consequences resulting from President Bush's decision. With the President's approval rating well over 80 percent since the September 11th attack, those who contest any of his decisions have been receiving feelings of anger from those who support him. I, however, would like to take a stand and contest Bush's decision to limit the [stem cell research](#) funding. This paper presents two articles that examine Bush's decision in different ways; one looks at the consequences from the point of view of stem cell researchers, and the other presents an avenue for the Presidential administration to defend their decision, which happens to be contradictory to their claim to be concerned with the science behind stem cell research. While the Janesville Gazette article is supposedly a defense of Bush's decision, analyzing the claims and actual behaviors of Tommy Thompson and President Bush exemplifies their weak argument.

The Newsweek article by Begley (2001) conveys information about the consequences of

President [George W. Bush](#)'s decision to limit the federal funding for stem-cell research to the 64 colonies already in existence. The article does not explicitly state President Bush's decision to limit the funding of the research to the current 64 colonies, but only states that the President announced, "there were scores of stem-cell colonies around the world that federally funded scientists would be allowed to study." Begley's way of co...

... middle of paper ...

...n's position, a careful analyzer can see major contradictions between his claims to use science to make the decision and his actual decision obviously not being based on science. By also examining an article which roots itself in the people involved daily with stem cell research, and by capturing their concerns with the President's funding decision, this paper serves as a well rounded critique of Bush's stem cell research funding decision in a time when patriotism does not allow for easy critiques of the current administration.
