Studying Abroad Have you ever thought about studying abroad? No, not just for a few months for your work-experience, but a whole year (or longer) as a transfer-student. Of course, you don't make such a decision from one minute to the next. It needs to be thought over well. Going to college is a big change in your life because it usually means living on your own for the first time, but as a foreign student it is even a bigger change because you are on your own in another country. This is often the greatest concern for students to go abroad: to leave everything behind. They have trouble leaving their family and the familiar environment. They think this price is just too high. But if they only knew how rich they will be when they come back. The first thing to think about is the country you want to go to. There are many countries to choose from, but The United States of America in particular is a good place to continue your study for several reasons. First of all, a year in the USA will certainly improve your English, not only in writing, but also in speaking, reading, and understanding. Since English is a prominent international language, this extra training is everlastingly advantageous. Second, the United States is very extensive and offers many opportunities for international students to study there. You won't have much difficulty finding a university with a department specialized in your field of study. Switching to an university with a different system than the one you are used to will not only provide you with new ideas, but will also give you the opportunity to view your field of study from

another angle. Besides the extra skills you achieve, you show you are prepared to do something challenging: to cross the border. T..... middle of papercovered skills I never knew I had. So, besides learning something about other cultures, you also learn a lot about yourself. Enfin, if you consider studying abroad, this may be a good time to start. Continuing your study at an American university is not only an challenging and exiting experience, but also a great opportunity to improve your academic skills, learn more about other cultures, and after all more about yourself. International education has many advantages and it doesn't have to be expensive. There are many organizations, like the Netherlands America Commission for Educational Exchange (NACEE), that can help you with your finance and other necessary paperwork. And maybe your university is connected to an American university that offers scholarships for international students. The ways to get there are endless, but the decision to do it lies with you.
