

# Laptops vs. Desktops

The screenshot shows the EssayPro website homepage. At the top left is the EssayPro logo and navigation links: "How To Order", "Reviews", "About Us", and "Write My Essay". At the top right are links for "DBA: EPRO", "Log In", and "Sign Up". The main banner features a student sleeping at a desk with the text: "WRITING SERVICE AT YOUR CONVENIENCE", "You - Send us your homework", "We - Do it all for you", and "Grab your original paper for just \$10 per page with a free plagiarism report included". A "Write My Essay!" button is present. A "Calculate the price" widget shows options for "Writing", "Rewriting", and "Editing", with "Writing" selected. It also shows "Essay (any type)", "College", "2 weeks", "1 page / 275 words", "Double spaces" (selected), and "Single spaces", resulting in a price of "\$11.4" and a "Write My Paper" button. Below the banner, there are three review sections: "EssayPro Reviews" with a 4.9 rating, "ResellerRatings" with a 4.9 rating, and "Sitejabber" with a 4.8 rating.

Laptops vs. Desktops

Which is the better computer?

Laptops vs. Desktops

The history of computers begins about 2000 years ago, starting with what was known as the abacus, a wooden rack holding two horizontal wires with beads strung on them. From there, computers grew. Computers as most would think of them began in 1936 and grew from there. First there was the Z models – Z1 (the first binary computer), Z2 (the first fully functioning electro-mechanical computer), Z3 (the first electronic, fully programmable digital computer based on a binary floating-point number and switching system), and Z4 (used punched cards to store programs and had a mechanical memory able to hold 1,024 words and several card readers) created by a German construction engineer by the name of Konrad Zuse. He wanted to overcome the difficulties of keeping track of large calculations. He understood that an automatic-[calculator](#) would require a control, a memory, and a calculator. The block structure of the Z3 is somewhat identical to a modern computer. It consisted of separate units, some being a punch tape reader, control unit,

floating-point arithmetic unit, and input/output devices.[1] Between 1939 and 1942, Professor John Atanasoff and Clifford [Berry](#), built the world's first electronic digital computer at [Iowa](#) State University. The Atanasoff-Berry Computer portrayed many improvements in computing, including a binary system of arithmetic, parallel processing, regenerative memory, and a separation of memory and computing functions. This model was able to calculate approximately one operation every fifteen seconds. [2]

Grace Hopper and Howard Aiken were the inventors of the MARK computers at Harvard University. The series began ...
