No description available From Bixby Vision 3.7.37.32: Bixby Vision application is a great tool. ' is a complementary application to Samsung's Bixby Assistant that allows you to look for things with images in a completely intuitive way. All you have to do is open the camera on your smartphone and point it to something. In 2017, Samsung released this Bixby virtual assistant that is very similar to Siri or Cortana that helps users in certain activities. This assistant is divided into voice, house and vision. By Voice, users can activate the assistant using Voice or long pressing the button under control of the device volume. You can interact with fitness trackers or appliances from your device through Home. Now let's talk about the Bixby Vision which is integrated with the camera application of our device that works as an augmented reality app, is able to detect objects in real time and also has the ability to buy items if they are available. You will also find support for reading the QR code, recognition of important references such as symbols or text translation. To take full advantage of your Samsung Assistant you can search for things with pictures, with Bixby Vision. All you need is a Samsung smartphone and a Bixby. The operating system of your device must be at least Android 9.0. If you want to use the app, you can download the Bixby Vision app on your mobile phone from any source available. Technical information Download similar apps to Bixby Vision: In 2017, Samsung released the Bixby-based virtual assistant for its Galaxy S8 range, which just like Google Now, Siri or Cortana intends to help us perform some tasks such as doing online searches or setting reminders for events and appointments. The Augmented Reality of Bixby This assistant is divided into three parts: Voice, Home and Vision. The voiceusers activate the wizard by their own voice or by pressing the button long under the volume control of the device. The On the other hand, Bixby Home allows us to interact with fitness trackers or appliances from our device. And finally, this Bixby Vision is integrated into the camera application of our device that acts as an enhanced reality application that is able to identify objects in real time and offers us the possibility to purchase them if they are available. It also supports the reading of the QR code, the recognition of important references such as signs or text translations. Bixby lets you focus on what matters most.
